

You are expected to present your exploration of the assigned paper in the class. This a chance to refine further your presentation skills. You need also to submit your presentation slides before the presentation day and make any further suggested amendments after the presentation following the opponent feedback, as well as answering the opponent questions. Although you are not restricted by the style and structure of the presentation, the following is an indicative guide:

TITLE SLIDE

- State the Research Area addressed in the assigned publication
- State the assigned publication details
- State your name

MOTIVATION SLIDE(S)

- State the research questions the publication is attempting to answer
- State why the question is important
- *State some important issues involved*

RELATED WORKS' SLIDES

- State few (e.g.. 3) related publications referred to by the assigned publication
 - State how the scope of each referenced publication relates to the assigned publication
 - Highlights the source findings or results with respected to the stated research question identified earlier in the assigned publication

DISCUSSION SLIDE(S)

- Discuss the publication contribution with respect to the stated research question
- Reveal any evaluation of the proposed contribution
- Contrast the proposed approach against the related publication discussed earlier

CONCLUSION SLIDE(S)

- State your conclusions about the assigned publication
- State the implications of the proposed contributions with respect to the issues raised in the introduction earlier
- State what would be the next step to carry out, if you were to continue this research work
